

IQVIA™ ON-DEMAND MATCHING

Add IQVIA Master Keys to your data

As the number of disparate data sources within your organization multiply, the challenge is ensuring all sources can communicate with each other by cross-referencing HCP/HCO IDs.

IQVIA On-demand Matching is an end-to-end match solution that enables and facilitates ongoing data integration between multiple sources originating from internal or external systems. Matching is performed against the entire IQVIA Reference Data universe, not only what you subscribe to.

- Self-service solution provides users with full control over the matching process including loading, validating and exporting.
- Compatible with other proven IQVIA technology platforms.
- Easier to use, and a more robust solution than manual matching.

IMPROVE OPERATIONAL EFFICIENCY

- On-demand Matching automatically matches your file against IQVIA Reference Data (OneKey, FinDr, TSA outlet master).
- Matching is performed against the entire IQVIA Reference Data universe, not only what you subscribe to.
- Unmatched records can be researched and manually matched by the Client or IQVIA.
- Matched records can be exported at any time. You can decide to export all matched records or export by time period, input source, and other parameters.

ON-DEMAND TECHNOLOGY

- Powerful online matching engine integrated with your systems
- Intuitive user interface to manually resolve ambiguous and unmatched records
- Simple data interfaces.

ON-DEMAND SERVICES

- Data stewardship services to help you resolve unmatched records
- Data profiling
- Matching rules optimization
- IQVIA can also integrate this solution with your other systems.

SPEEDY DEPLOYMENT

- SAAS technology
- Templates and pre-canned configuration will ensure quick deployment of the solution.

Meet your specific challenges with IQVIA Technologies. Take advantage of our proven technologies and unsurpassed domain expertise, with cloud-based solutions that support your therapies throughout the clinical and commercial lifecycle.
