

Go Beyond Expectations—With State-Of-The-Art IQVIA Risk-Based Monitoring

Seamlessly connect remote centralized monitoring with targeted analytics.

IQVIA Risk-Based Monitoring is a powerful and innovative operating model that integrates rapid speed, superior accuracy, and enhanced site support that ensures optimal clinical trial management and further underscores IQVIA's commitment to sustainable monitoring solutions.

Enhanced site support

Remote centralized monitoring provides greater support capabilities, availability, and expertise to sites.

Accelerated milestones

Faster, better-informed decisions are achieved by rapid data turnarounds and uniquely granular identification of critical risk factors.

Superior risk assessment & targeting

Maximum focus and effectiveness in risk mitigation is enabled by enhanced IQVIA AIML algorithms that delineate and prioritize low- and high-signal risks.

Flexible and customizable- with global reach

IQVIA RBM can be modularized, and represents a global solution.

Maximizing quality and site outcomes

Optimized scientific integrity is achieved by minimizing protocol amendments while enhancing transparency and inspection readiness.

Supports sustainability goals

IQVIA is firmly committed to maximizing efficiency of resources, reducing the frequency of site visit transportation, consuming less water, and minimizing the use of plastics.

It's time to take trial management to a whole new level with IQVIA Risk-Based Monitoring

Imagine

A powerful centralized risk-based operating model that eliminates gaps in oversight seen in traditional site-based models—while helping to reduce travel requirements and conserve resources.

Envision

Tapping into a risk prediction capability fueled by AIML algorithms harnessing a vast library of more than 300 risk-based monitoring clinical trials.

Optimize

Using the ability to course-correct so rapidly that your data quality is consistently optimized, while critical milestones—and time-to-market—are accelerated.

In addition, IQVIA Risk-Based Monitoring is a flexible solution that can be customized—if required—to adapt to your specific trial requirements.

Contact us *now* to learn more about how IQVIA Risk-Based Monitoring can give you the added reassurance of:

- Faster, better-informed decisions
- Maintaining scientific integrity
- Minimizing protocol amendments
- Optimizing inspection readiness—setting your clinical trial up for maximum success
- Leveraging an environmentally-sensitive operating model

Surpass expectations with intelligent connections

IQVIA Connected Intelligence™ seamlessly connects remote centralized monitoring with targeted analytics—driving rapid and precise prediction of risk, robust site support, and enhanced transparency that optimize the success of your clinical trial.
