

IQVIA CENTRALIZED MONITORING

Accelerate the benefits of risk-based monitoring (RBM)

THE SITUATION

Pharma companies are implementing RBM solutions – but may not have the experience and technology to do so effectively. Realizing the benefits of RBM requires a focus on change management and developing new workflows supported by integrating innovative technologies and multiple data sources.

THE CHALLENGE

THE SOLUTION

IQVIA Centralized Monitoring provides a highly adaptive approach to best meet your unique clinical operations requirements.

<p>KRI & trigger management Mitigate risk and manage triggers </p>	<p>Predictive & advanced analytics Identify potential site performance and patient safety issues </p>	<p>Early signal detection Address early subject data issues </p>	<p>Global hubs Geographically scalable, with standard processes to provide optimal support</p>
<p>Innovative technology platform Work with your existing systems and data</p>	<p>Holistic subject-level data review Medical review of subject-level data for faster ID of potential trends & issues</p>	<p>Targeted site support Enhance site services and CRA efficiency </p>	<p>Full operational transparency Complete customer service for accountability, transparency, oversight</p>

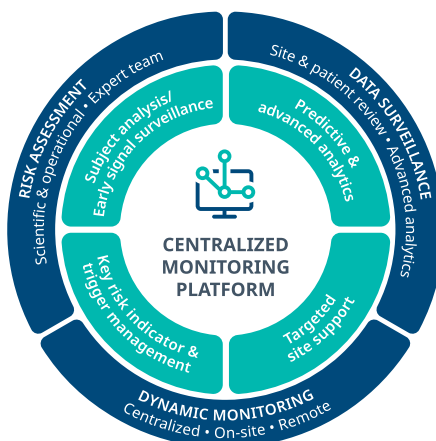

THE IQVIA DIFFERENCE: Flexibility and value

Partner with the RBM market leader to fully transform your clinical development with a highly adaptable, fully integrated Centralized Monitoring solution, operating in our global delivery network to accelerate your time to full RBM benefits.

TECHNOLOGY AND DATA INTEGRATION

We collaborate with your IT team to integrate and validate your data, leveraging our unique centralized monitoring platform to speed operational readiness and effectiveness
